

A large, historic stone building with a prominent central clock tower and multiple gables, set against a cloudy sky. The building is surrounded by a green lawn in the foreground.

# WHAT YOU NEED TO KNOW ABOUT THE TRI-AGENCY RDM POLICY

December 13<sup>th</sup>, 2021

Jay Brodeur, PhD

Associate Director of Digital Scholarship Services at McMaster University Library

Isaac Pratt, PhD

Research Data Management Specialist

- McMaster University sits on the traditional Territories of the Mississauga and Haudenosaunee Nations, and within the lands protected by the “Dish With One Spoon” wampum agreement.

*McMaster University sits on the territories of the Mississauga and Haudenosaunee Nations, and within the lands protected by the “Dish With One Spoon” wampum agreement.*

# SESSION RECORDING

- This session is being recorded with the intention of being shared publicly via the web for future audiences.
- In respect of your privacy, participant lists will not be shared outside of this session, nor will question or chat transcripts.
- Questions asked via the chat box will be read by the facilitator without identifying you. Note that you may be identifiable when asking a question during the session in an audio or visual format.

# CODE OF CONDUCT

- We are committed to fostering a supportive and inclusive environment for its presenters and participants.
- As a participant in this session, you agree to support and help cultivate an experience that is collaborative, respectful, and inclusive, as well as free of harassment, discrimination, and oppression. We reserve the right to remove participants who exhibit harassing, malicious, or persistently disruptive behaviour.
- Please refer to the Sherman Centre code of conduct webpage for more information:

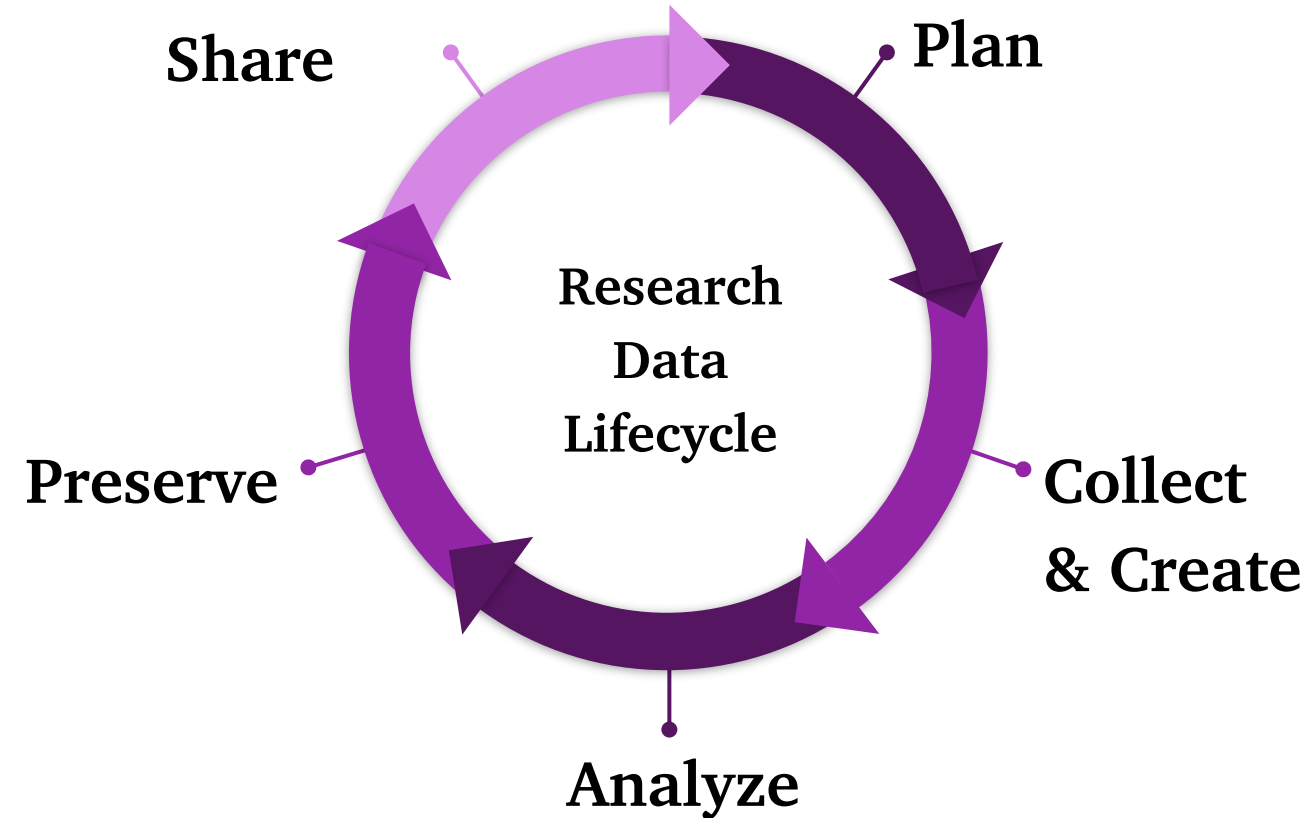

[scds.ca/events/code-of-conduct/](https://scds.ca/events/code-of-conduct/)

# OUTLINE

- What is Research Data Management (RDM) and why should we care about it?
- How does the new Tri-Agency Policy for RDM impact researchers?
- How can McMaster RDM services help?

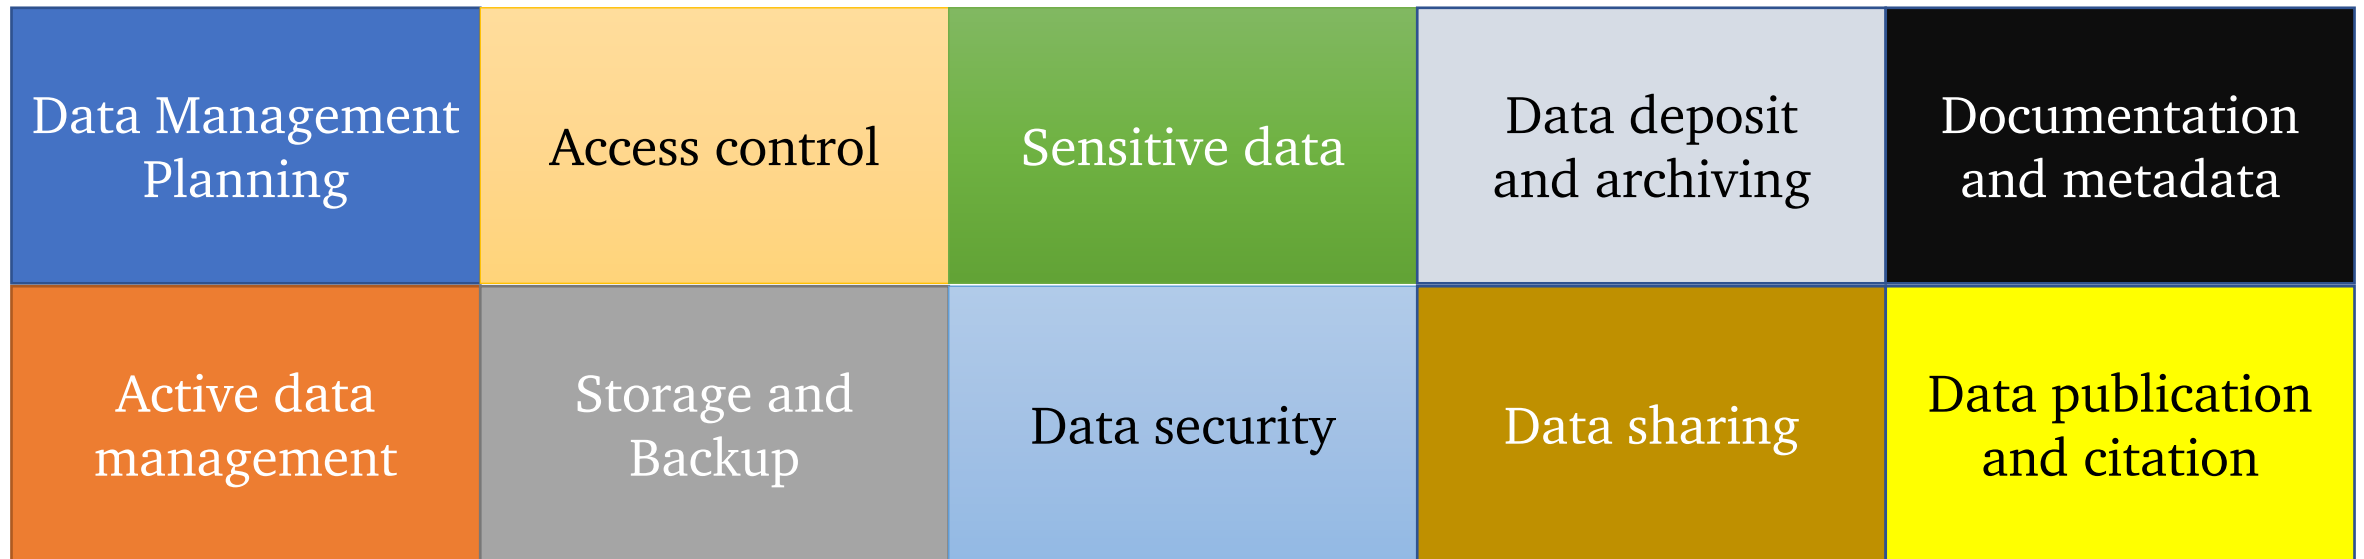

# WHAT IS RESEARCH DATA MANAGEMENT?

**Research Data Management** is the active organization & maintenance of data throughout the research data lifecycle to ensure its **security, accessibility, usability, and integrity**

*For a fuller introduction to RDM see our earlier webinar “Best Practices for Managing Data in your Research” [scds.github.io/intro-rdm/](https://scds.github.io/intro-rdm/)*

# WHAT IS RESEARCH DATA MANAGEMENT?

*For a fuller introduction to RDM see our earlier webinar “Best Practices for Managing Data in your Research” [scds.github.io/intro-rdm/](https://scds.github.io/intro-rdm/)*

# WHY IS RESEARCH DATA MANAGEMENT IMPORTANT?

- Proper **data planning and organization** saves time and resources
- Good **data storage and backup** strategies help avoid loss of data from aging/mechanical failure of storage devices
- Robust **data security** practices protect your valuable data
- **Depositing and Publishing data** improves research visibility and transparency
- **Sharing data openly and FAIRly** allows data to be reused for new scholarship

**F** Findable  
**A** Accessible  
**I** Interoperable  
**R** Reusable

Wilkinson, M., Dumontier, M., Aalbersberg, I. *et al.* The FAIR Guiding Principles for scientific data management and stewardship. *Sci Data* **3**, 160018 (2016). <https://doi.org/10.1038/sdata.2016.18>

But now...

Some questions for you

# TRI-AGENCY STATEMENT OF PRINCIPLES ON DIGITAL DATA MANAGEMENT: **EXPECTATIONS**

- Data management planning
- Constraints and obligations
- Adherence to standards
- Collection and storage
- Metadata
- Preservation, retention and sharing
- Timeliness
- Acknowledgement and citation
- Efficient and cost-effective

Tri-Agency Statement of Principles on Digital Data Management <http://www.science.gc.ca/default.asp?lang=En&n=83F7624E-1>

# TRI-AGENCY STATEMENT OF PRINCIPLES ON DIGITAL DATA MANAGEMENT: **RESPONSIBILITIES**

## Researchers

- incorporating best practices
- developing DMPs
- adhering to policies and standards

## Research Communities

- developing & promoting standards
- fostering excellence
- selecting repositories

## Research Institutions

- supporting best practices
- providing access to resources
- creating guidance and policies

## Research Funders

- developing policies & guidance
- promoting data management
- providing peer reviewers

Research Data Management

Tri-Agency Statement of  
Principles on Digital Data  
Management

Open Letter

Tri-Agency Research Data  
Management Policy

Public Consultation  
Summary

Frequently Asked  
Questions

## Tri-Agency Research Data Management Policy

### 1. Preamble

The [Canadian Institutes of Health Research \(CIHR\)](#), the [Natural Sciences and Engineering Research Council of Canada \(NSERC\)](#), and the [Social Sciences and Humanities Research Council of Canada \(SSHRC\)](#) (the agencies) are federal granting agencies that promote and support research, research training, knowledge transfer and innovation within Canada.

The agencies expect the research they fund to be conducted to the highest professional and disciplinary standards, domestically and internationally. These standards support research excellence by ensuring that research is performed ethically and makes good use of public funds, experiments and studies are replicable, and research results are as accessible as possible. Research data management (RDM) is a necessary part of research excellence.

The agencies believe that research data collected through the use of public funds should be responsibly and securely managed and be, where ethical, legal and commercial obligations allow, available for reuse by others. To this end, the agencies support the FAIR

- “Research Data Management is a necessary part of research excellence.”
- “Recognize that data related to research by and with **First Nations, Métis, or Inuit** in Canada must be managed in accordance with data management principles developed and approved by these communities.”

**TRI-AGENCY  
RDM POLICY**

**Institutional  
Strategy**

**DMPs**

**Deposit**

## Institutional Strategy

“Each postsecondary institution... is required to create an institutional RDM strategy and... make it publicly available on the institution’s website.”

“An institutional RDM strategy describes how the institution will provide its researchers with an environment that enables and supports RDM practices”

Research institutions must post their RDM strategies by **March 1, 2023.**

# MCMASTER RDM INSTITUTIONAL STRATEGY WORKING GROUP

- The working group reports to the Research Information Technology (Tier 2, IT) committee.
- Group tasked with developing a draft Institutional RDM Strategy for mid-2022.
- Membership includes researchers from each Faculty, representatives from the ethics boards, libraries, and research support units (including ROADS/HRS/MILO).
- Learn more at [rdm.mcmaster.ca/iswg](https://rdm.mcmaster.ca/iswg)

# MCMASTER RDM INSTITUTIONAL STRATEGY DEVELOPMENT

1. Assemble Your Strategy Development Team

## **2. Assess the Current State of RDM**

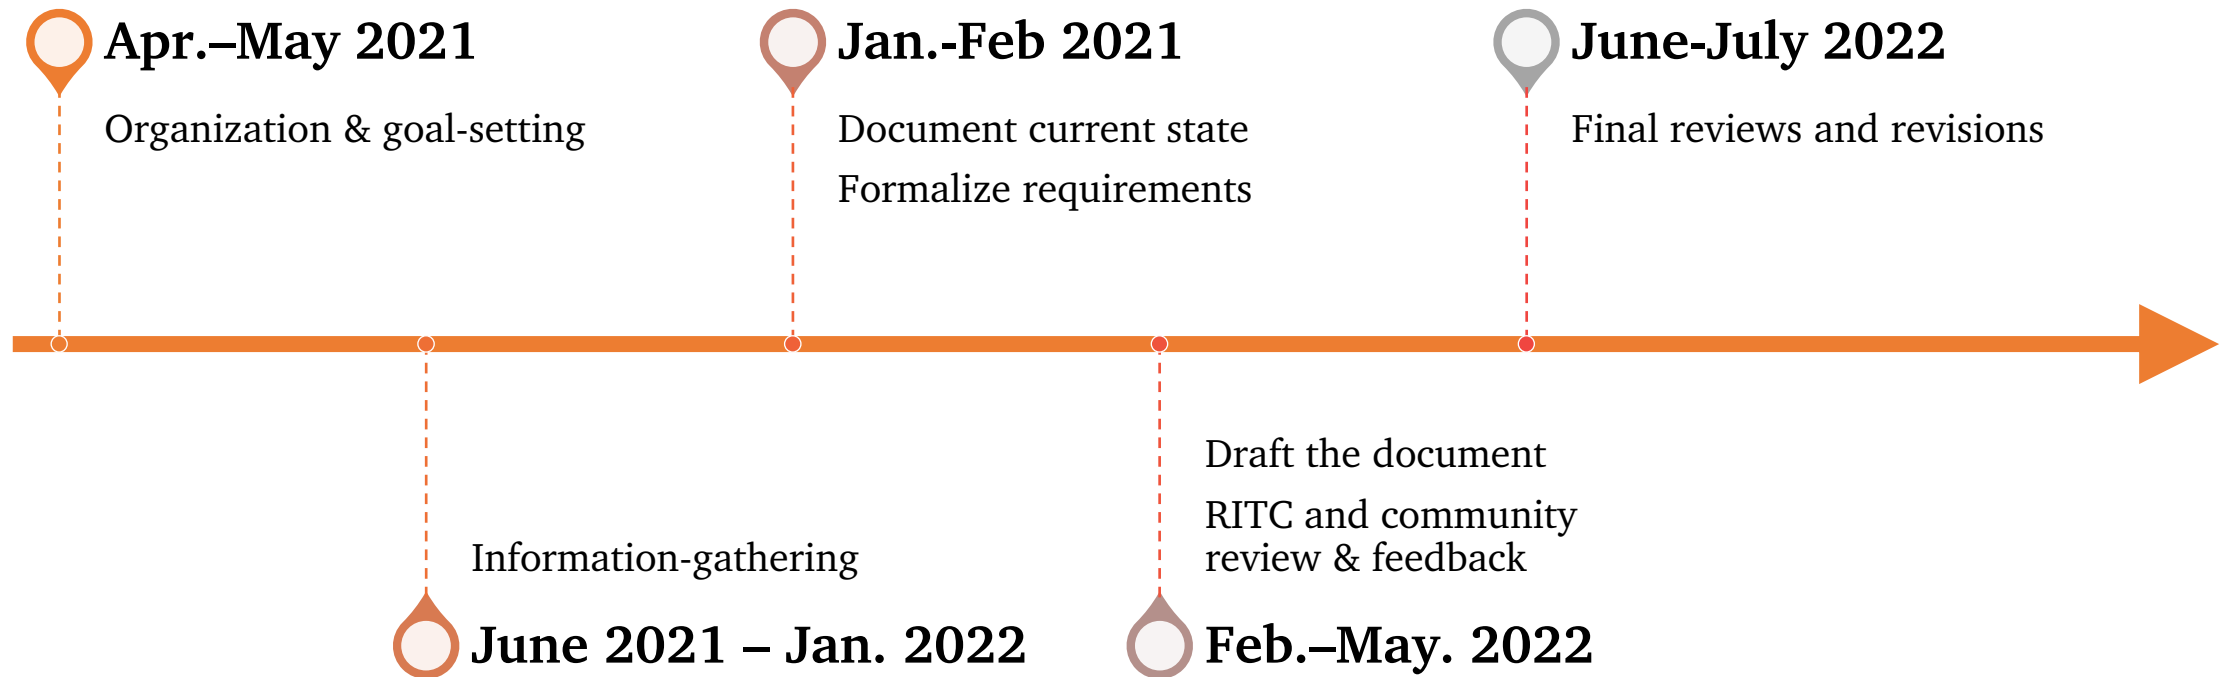

- Assessing research data management needs and challenges of researchers through a survey: <https://u.mcmaster.ca/rdm-survey>
- Assessing the maturity of current research data management services, policies, and infrastructure

3. Envision the Future State of RDM

4. Articulate Your Institution's Path Forward

5. Assemble and Launch Your Strategy

# MCMASTER RDM INSTITUTIONAL STRATEGY DEVELOPMENT

DMPs

“For certain funding opportunities, the agencies will require data management plans (DMPs) to be submitted”

We provide guidance and templates for researchers using the **Portage DMP Assistant**

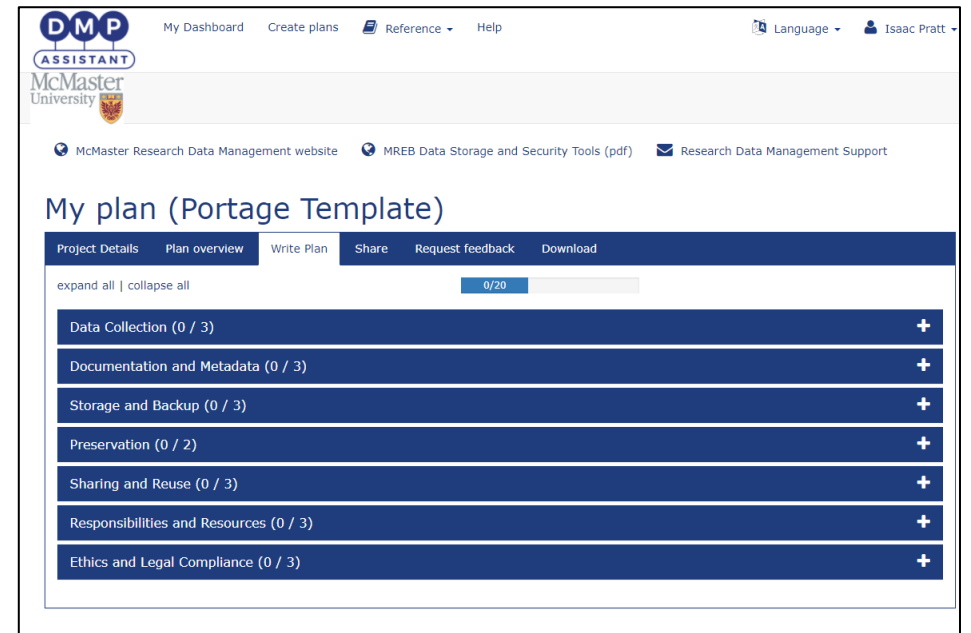

Initial set of grants will be announced **Spring 2022**.

# DATA MANAGEMENT PLANNING

A **Data Management Plan (DMP)** is a living document that describes how you will create, organize, secure, archive, and share or publish your research data.

- DMPs let you proactively determine how you will manage your data through all stages of your research projects and after a project's completion.
- DMPs are an excellent way for you to anticipate and identify opportunities and challenges in managing your data before those opportunities and challenges emerge.

- A web-based, bilingual data management plan creation tool
- An interactive guide to creating a “good” DMP with built in templates
- Available to all researchers in Canada for free
- Portage also publishes [DMP exemplars](#)

<https://assistant.portagenetwork.ca/>

## Deposit

“Grant recipients are required to deposit into a digital repository all digital research data, metadata and code that support... journal publications and pre-prints”

We support a data repository for McMaster researchers: the **McMaster Dataverse**

Note: Grant recipients will **not** be required to openly share their data

Dates still TBD. SSHRC and some CIHR data is already required to be deposited.

# WHY DEPOSIT DATA?

Depositing data helps to ensure that data are **securely preserved** and **accessible** (to you and others) in the long term.

In addition to requirements, you may **want** to deposit your data for the following reasons:

- To comply with potential audits
- A journal may request the data to verify or reproduce your results
- To prevent data loss and keep data organized
- To create a long lasting record of your work
- To enable data sharing, where desired and appropriate

# CIHR DATA REQUIREMENTS

CIHR has some specific data related requirements which are currently in force. Researchers are required to:

- **Deposit bioinformatics, atomic, and molecular coordinate data into the appropriate public database**
- **Retain original data sets for a minimum of five years after the end of the grant.**

# SSHRC DATA REQUIREMENTS

SSHRC also has some specific data related requirements which are currently in force. Researchers are required to:

- **Preserve and make available for use by others** all research data collected with the use of SSHRC funds. This must occur within “a reasonable period of time”
- SSHRC considers "a reasonable period" to be within **two years** of the completion of the research project for which the data was collected.

# WHERE CAN I DEPOSIT MY DATA?

- A **data repository** is a web platform and storage space for researchers to deposit data sets associated with their research. Repositories provide:
  - long-term storage and access to research data beyond the life of a grant, research project, or individual careers.
  - Discoverability and findability for datasets through features like indexing and DOIs.
  - Easy to use shared platforms designed for researchers

# RESEARCH DATA REPOSITORIES

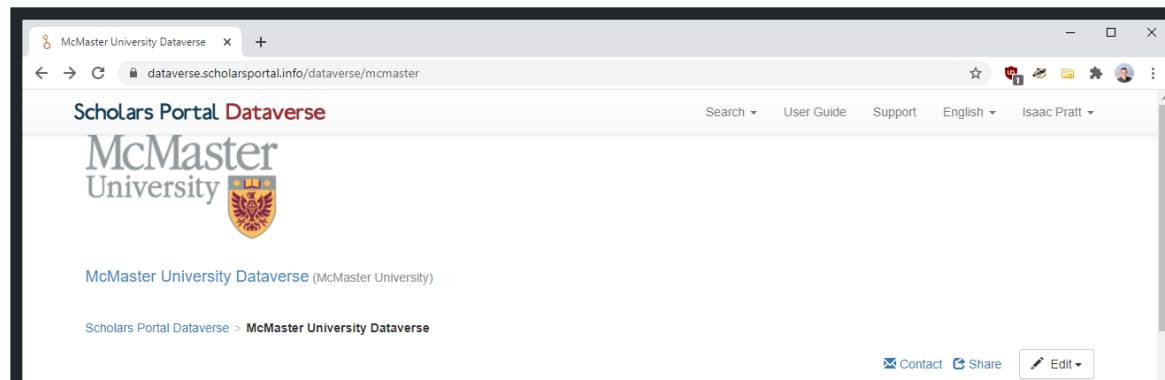

- Institutional Data Repository: **McMaster Dataverse**
- External Data Repositories:
  - Domain specific  
<https://www.nature.com/sdata/policies/repositories>
  - **FRDR**, Zenodo, Figshare, Dryad, etc
- Code repositories: Github, Gitlab, BitBucket, etc
- Search for repositories on **re3data.org**

# MCMMASTER DATAVERSE

[dataverse.scholarsportal.info/dataverse/mcmaster](https://dataverse.scholarsportal.info/dataverse/mcmaster)

- McMaster's Institutional Data Repository is a home for all research data originating from McMaster researchers.
- We provide basic data curation services by professionals at McMaster

Research &  
High Performance  
Computing

Library

# MCMMASTER DATAVERSE

- Researchers can control what license they use for data sharing
- Researchers can choose whether to share their datasets openly or through limited access.
- Researchers can monitor statistics about the use of their data.
- Deposits can be set up anonymously for double blind reviews.

# FEDERATED RESEARCH DATA REPOSITORY (FRDR)

<https://www.frdr-dfdr.ca/repo/>

- Available to any researcher affiliated with a Canadian institution
- Built for large (1 TB+) datasets
- Datasets are actively curated by professional staff at FRDR
- Datasets must be open access but can be embargoed for a one year period

# SENSITIVE DATA IN FRDR

The Federated Research Data Repository (FRDR) is working on a pilot project to add optional zero-knowledge encryption to the repository.

**“Zero-knowledge encryption”** means that FRDR will never be able to access your data directly. All datasets that are deposited are encrypted and their keys deposited into a separate researcher managed platform.

This allows you to store your data in a trusted repository for archival but still control a restricted access protocol.

interested in using this service? email me: [rdm@mcmaster.ca](mailto:rdm@mcmaster.ca)

# Research Data Management Services

McMaster provides **Research Data Management Services** for all researchers including:

- Consultations
- Training
- Resources

Contact us at [rdm@mcmaster.ca](mailto:rdm@mcmaster.ca)

# MCMASTER RDM SERVICES: CONSULTATIONS

We can meet with a researcher or research group to discuss RDM needs including:

- Data deposit for sharing and archival, with specific support for [McMaster Dataverse](#)
- Data Management Plan creation and management
- Data storage & backup, data security, metadata & data documentation

# MCMASTER RDM SERVICES: **TRAINING**

We can present targeted workshops to research groups, academic units, or other groups on any aspect of RDM.

We run public webinars through the Sherman Centre for Digital Scholarship

- Upcoming webinars are listed on the [SCDS website](#)
- We post all [recordings of previous workshops online](#)

# MCMASTER RDM SERVICES: RESOURCES

Check out our RDM website with great information and resources:

<https://rdm.mcmaster.ca/>

Research Data Storage Finder <http://u.mcmaster.ca/storagefinder>

The screenshot displays the 'Research Data Storage Finder' web application. It is divided into two main sections: 'Step 1: Answer these questions to narrow down storage provider options.' and 'Step 2: Select data storage providers you would like to compare'.

**Step 1:** Includes a 'CLEAR ANSWERS' button and two questions. Question 1 is 'What risk level is your data?' with radio button options for 'Low', 'Medium', and 'High'. Question 2 is 'What type of data storage are'.

**Step 2:** Includes a 'SELECT ALL' button and a 'CLEAR SELECTIONS' button. Below these are several storage provider options, each with a radio button and a description:

- Compute Canada:** Advanced research computing systems, storage and software.
- Compute Canada NextCloud:** Advanced research computing File hosting services.
- Dataverse:** Store, share, publish and discover research data.
- FRDR:** Find and Share Canadian Research Data.
- Github:** Distributed version control system for software code.
- MacDrive:** File Synchronization and Sharing solution.

Additional providers like 'MacDrive' and 'McMaster-based' are partially visible at the bottom.

# Discussion Prompts

- What aspects of the T-A policy are you unclear or concerned about?
- What impact will the policy have on your research?
- What RDM-related challenges do you face in your research?
- What kinds of resources, services, and supports do you need?

# THANK YOU!
